- Name
- Name

Setup

Setting up your own documents on RtD is easier than you think, though you may need a lot of trial and error to get used to it.

2.1 Clone the repo

```
$ git clone git@github.com:hauten/DocsForReal.git
$ cd DocsForReal
$ git checkout master
```

See also the *Bibliography*.

2.2 Tables

Table 1. *Guesses about what large cats eat.*

Feline	Habitat	Presumed diet
Lion	Prairie	Herbivores
Tiger	Forest	Small carnivores
Jaguar	Jungle	Rodents and birds

Table 2. *Guesses about what large dogs eat.*

Canine	Habitat	Presumed diet
Wolf	Forest	Large herbivores
Coyote	Prairie	Small herbivores
Fox	Prairie	Rodents and birds

2.3 Lists

1. Number one

2. Number two

3. Number three

- List with nested sub-bullets

- Another bullet

    - Sub-bullet

- Back to main list level

Bibliography

1. Citation

2. Citation linked to an external website

CHAPTER 4

Other Sources

1. Link to somewhere else (though this is not truly a link)

2. Link to another website

What about a code block?:

```
Surrounded by blank lines
Indented three spaces on each line
```

Then the regular text resumes below the block.

Displaying an image may be important to some projects. It's not necessarily intuitive.

Fig. 1: This is the figure caption for the Canada geese.
